

## **Manufacturing Engineer**

### **Company Overview**

Gastronomous is a fast-paced, dynamic start-up focused on revolutionizing how food is prepared and enjoyed worldwide! Having developed Canada's first [fully autonomous kitchen](#), Gastronomous realizes the "Kitchen of the Future" through advanced industrial automation techniques and cutting-edge technologies.

We are a no-nonsense team of passionate people with a bias for action. We know that our ability to execute on our ideas is what sets us apart. We do what we say we are going to do, externally and internally. We trust our people to act independently and make practical, real-world decisions.

If you are passionate about developing meaningful technology that creates meaningful solutions, then Gastronomous is the place for you! By joining our team, you will be immersed in a dynamic and thought-provoking environment that tests your capabilities and pushes you to new heights.

Gastronomous is looking for a **Manufacturing Engineer** who will be a central part of our core team and will work closely with the engineering team. This role is geared towards an individual with a can-do attitude, strong work ethic, and demonstrated passion for innovative technology as well as research & development.

### **What You'll Do:**

- Be the subject matter expert on technician capabilities: hardware and electrical wiring assembly, troubleshooting and repair.
- Oversee and directly work on internal assembly operations, ensuring products are manufactured to the highest quality standards.
- Implement and maintain strict quality control procedures to guarantee product consistency and reliability.
- Collaborate closely with the engineering team to provide feedback on design for manufacturability, suggesting improvements and modifications to enhance production efficiency and product quality.
- Manage and optimize inventory levels, ensuring a smooth and cost-effective supply chain.
- Monitor and analyze production metrics, implementing process improvements to increase productivity and reduce costs.
- Directly work on fabricating machinery when required
- Stay abreast of the latest manufacturing technologies and industry trends, implementing innovations that can benefit the company's manufacturing processes.

**Knowledge, Skills, and Abilities for Success:**

- Technical certification or diploma in a related field is preferred.
- Hands-on!
- Experience operating mil, lathe, and similar machinery
- Strong understanding of metal properties and fabrication techniques.
- Ability to read and understand blueprints and technical drawings.
- Excellent leadership and team management skills, with the ability to inspire and motivate others.
- Strong analytical and problem-solving abilities, with a keen attention to detail.
- Excellent communication and interpersonal skills, with the ability to work effectively with cross-functional teams.
- Proficiency in manufacturing software and ERP systems.
- Flexibility to adapt to changing priorities in a fast-paced environment.
- Strong grasp of SolidWorks

**Soft Skills:**

- 3+ years of experience in manufacturing industry
- Must be able to work independently and with a multidisciplinary team.
- Organized and efficient, able to self-manage projects and present deliverables on time or communicate delays.

This is a full-time position with a competitive salary and benefits package. If you are passionate about robotics and have a strong desire to build products of the future, please apply today.

We look forward to reading every application and welcoming a new, bright mind to Gastronomous shortly! If interested, please send your resume and any other relevant information to:
